PLLA FILLER | Safe, Natural, Long Lasting, & Gorgeous Effectiveness

FOR PROFESSIONALS

Rejubeau Stylish Le Ciel Rosy is a medical device indicated for the treatment of severe facial wrinkles and folds, replacement of volume defects, facial lipoatrophy, and improvement of facial contour deformities. Before using Rejubeau Stylish Le Ciel Rosy, please read the "IFU (Instruction For Use)" thoroughly or consult physicians.

LE CIEL ROSY

Poly-L-lactic acid fillers, more commonly known as PLLA fillers, are synthetic and bio-stimulatory dermal fillers intended for the natural restoration of facial and body volume loss.

Intended as a stimulator, PLLA fillers differ from traditional dermal fillers as they don't produce results instantly. Instead, PLLA fillers directly act on the dermal fibroblast, contributing to the natural production of new collagen in the skin. Once collagen stimulation commences in the injected area, patients can expect results to appear progressively over a few months.

SAFETY	GORGEOUS VOLUM UP	QUICK RECOVERY	LONG LASTING
--------	-------------------	----------------	--------------

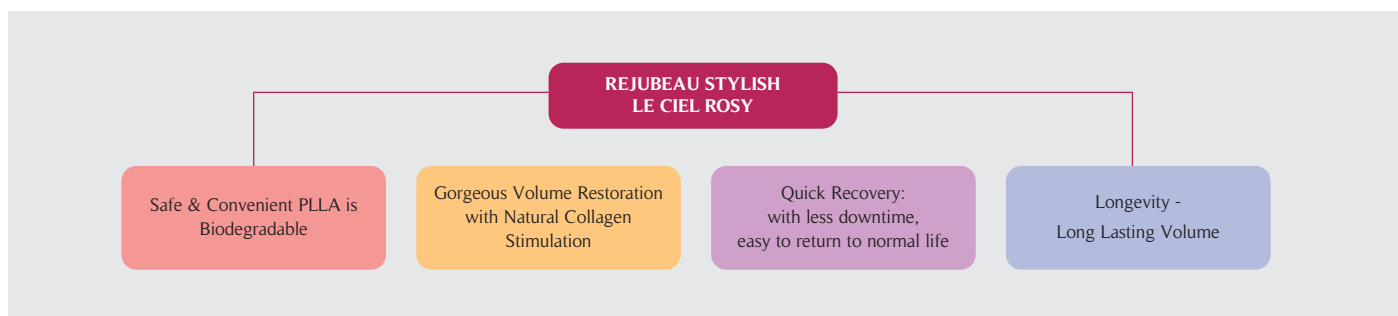

As a safe and effective collagen stimulator, Rejubeau Stylish Le Ciel Rosy is an injectable and biocompatible PLLA filler. Rejubeau Stylish Le Ciel Rosy helps to restore natural volume for aged skin lost collagen and the restored volume lasts for almost 2 years.

Model name	Packing unit	PLLA & CMC	Last
Le Ciel Rosy	365 ml x vial / 15 vials a box	365 mg / vial	18 ~24 months

• CE1434 • ISO13485 • GMP

WHY REJUBEAU STYLISH LE CIEL ROSY?

Natural Volume with Longevity and Wrinkle care Injected Poly L-Lactice Acid (Rejubeau Stylish Le Ciel Rosy) restores volume through stimulating collagen in the skin layer. Generated volume with own collagen lasts more than 2 years.

The correlation between Collagen & Skin aging

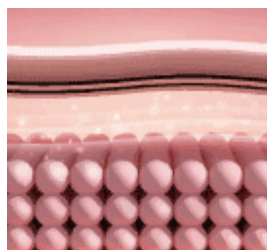

- The proportion of the collagen types in skin change with age. Young skin is composed of 80% type I collagen and about 15% Collagen type III. With age, the ability to replenish collagen naturally decreases by about 1.0%~1.5% per year.
- This decrease in collagen is one of the characteristic hallmarks associated with the appearance of fine lines and deeper wrinkles. [Picture 1]
- Moreover, deep inside in the dermis, fibrillar collagens, elastin fibres and hyaluronic acid, which are the major components of the extracellular matrix, undergo distinct structural and functional changes.

How Rejubeau Stylish Le Ciel Rosy works

PLLA (Poly L-Lactic Acid), the main ingredient of Rejubeau Stylish Le Ciel Rosy) is biocompatible and biodegradable synthetic polymer that has been used for sutures and other medical devices. Injected PLLA stimulates collagen generation, the volume gradually restored improves wrinkles.

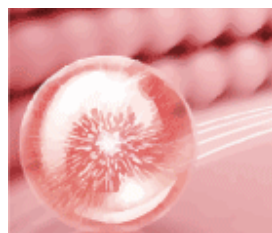

STEP 01
Inject diluted Rejubeau Stylish Le Ciel Rosy into the subcutaneous layer of the skin.

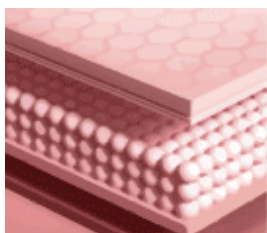

STEP 02
Firstly, wrinkle improvement can be shown with WFI(Water for injection) and diluted Rejubeau Stylish Le Ciel Rosy.

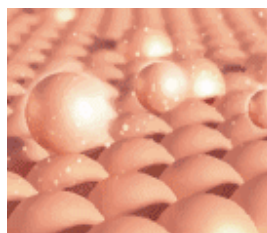

STEP 03
Within some days, after absorbing water, only Rejubeau Stylish Le Ciel Rosy particles left.

STEP 04
New cells are gathered around PLLA and increasing fibroblast.

STEP 05
Increased fibroblasts stimulate collagen generation and improve skin folds.

STEP 06
Generated collagen lasts for 2 years and Rejubeau Stylish Le Ciel Rosy particles are biodegraded.

PN SKIN BOOSTER

About PN : The core ingredient PN, is a substance that has been highly concentrated from PDRN. Due to this, its average molecular weight is approximately three times higher than that of PDRN. Additionally, the length of PN is longer than that of PDRN. As a result of having a larger average molecular weight and longer length, PN is expected to have better effects and stay in the body for a longer period of time compared to PDRN. PN is effective to improve skin texture, reduce the appearance of fine lines and wrinkles, and enhance wound healing. These blocks are known to work by stimulating the production of various growth factors in the skin, leading to increased cell turnover, improved blood circulation, and enhanced wound healing.

Feel the rejuvenation with REJUBEAU PN Skin booster

A revolutionary skincare solution that delivers intense hydration and nourishment to the skin, promoting a more radiant and youthful appearance

EFFECTS

Skin Regeneration

Boosts self-sufficiency by activating the skin's unique regeneration capabilities.

Oil and moisture balance restoration

Restores oil and moisture balance to reduce sebum production, shrink pores, and promote smoother skin.

Elasticity improvement

Increase the density and thickness of the dermis to improve elasticity.

Validated safety

Enhanced safety by using highly biocompatible tissue regeneration material PN and HA.

LINE-UP

PRODUCT	ACTIVE INGREDIENTS	PURPOSE	PROCEDURE AREA
EYE DEAL 	1% Polynucleotide (PN), 0.5% Sodium Hyaluronate(HA), Glutathione, Collagen peptides, Mannitol	Dark Spot Care, Healing, Hydration, Improves elasticity, Boosts collagen production	Face, Under Eyes, Dark Spot, Thin wrinkles, Neck line, Back of the hands
PN HEALER 	2% Polynucleotide (PN)	Super Healing, Skin barrier, Pore tightening, improves elasticity, Boosts collagen production	Face, Deep wrinkles, Scars, Dryness in the skin
AQUA BOMB 	1% Sodium Hyaluronate(HA), 0.5% Polynucleotide (PN), Glutathione, Collagen peptides, Adenosine, Palmitoyl Tripeptide-547, Acetyl Hexapeptide-8	Super Hydration, Healing, Improves elasticity, Boosts collagen production	Face, Under Eyes, Thin wrinkles, Neck line, Back of the hands

The dermis is a vital layer of skin responsible for elasticity and regeneration, densely populated with fibroblasts and blood vessels. For optimal results, skin booster injections should be administered into the dermal layer, where they can directly interact with the fibroblasts and blood vessels, promoting collagen production, skin rejuvenation, and overall skin health.

NEEDLE : 33G 4mm / INJECTION DEGREE : 25°

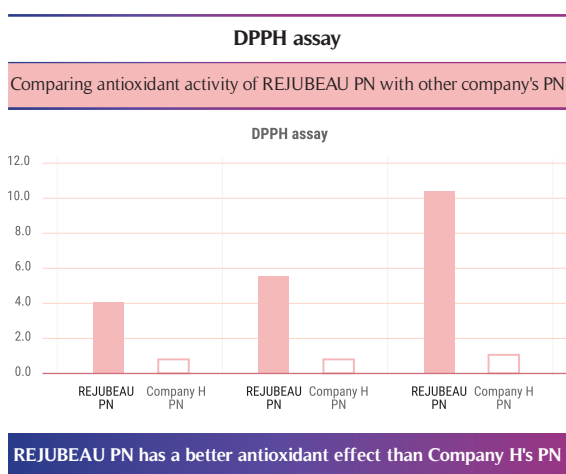

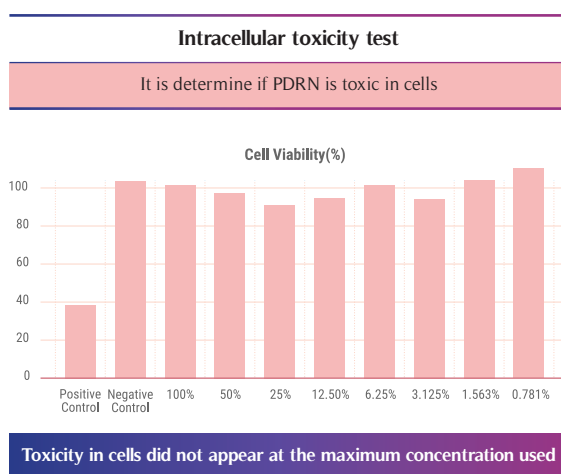

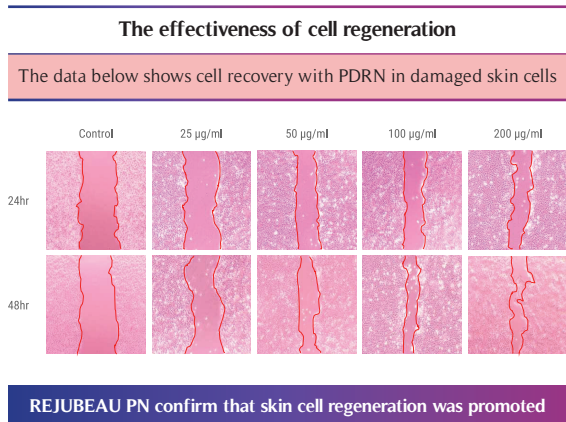

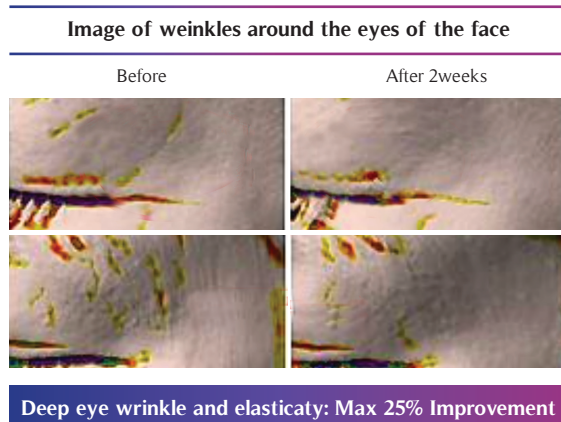

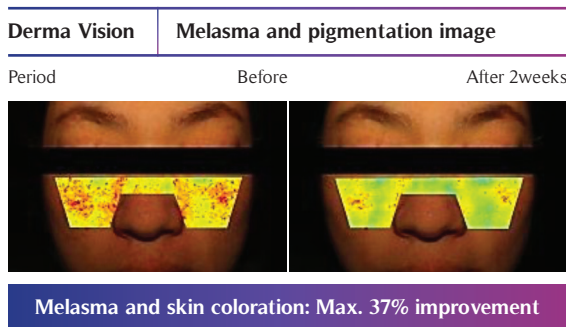

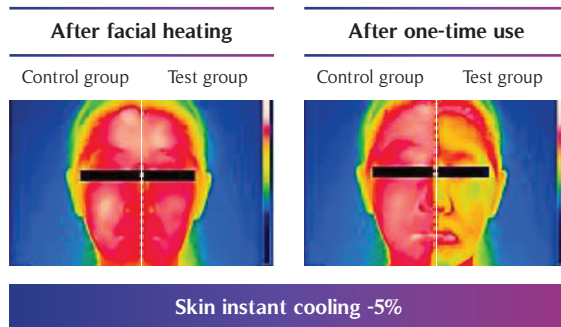

Reliable Quality of REJUBEU PN

Polynucleotide (PN) - A to Z Manufacturer

Our manufacturer directly farms rainbow trout in Pyeongchang, Republic of Korea, a clean area, and only company in Korea that has unified. [tout male fertilization - farming - DNA extraction - manufacturing of finished products]. Our manufacturer's unique male fertilization production know-how and high-purity extraction method enable customized production for each purpose.

REJUBEAU REjuvenation & Beauty **STYLISH™ RE : PEEL Program**

RE : PEEL

Deep peeling that removes dead skin cells by moving up the skin cell turn over cycle every 3~5 days to induce regeneration in the skin to make it smooth.

Natural Silitox (micro-needle form) mixed with the liquid solution penetrates deep into the skin and exfoliates dead skin and improves skin trouble, also inducing the collagen creation and elastin, makes the skin firm.

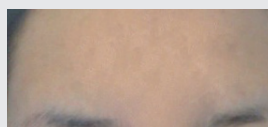

Since the stimulation is transmitted to the epidermis layer, it has also have the effect of improving skin problems like skin trouble, pigmentation, and wrinkles.

DELIVERY PROCESS Penetration of Silitox with liquid solution into skin ▶ Positive stimulation to epidermis
▶ Increase of blood circulation and oxygen delivery ▶ Strengthening epidermis layer ▶ Creation of collagen and elastin

REJUBEAU : Calming & Regenerating

REJUBEAU : CALMING

CENTELLA ASIATICA EXTRACT & MADECASSIC ACID & MADECASSOSIDE & ASIATICOSIDE

WOUND HEALING

stimulate collagen production and improve the healing process of cuts, burns, and other skin injuries.

SKIN HEALTH

improve skin elasticity, reduce the appearance of scars, and support overall skin health.

ANTI-INFLAMMATORY

help reduce inflammation in the body.

ANTIOXIDANT

contains antioxidants that can help combat oxidative stress and protect cells from damage.

DIOSPYROS KAKI LEAF EXTRACT

ANTIOXIDANT PROPERTIES

is rich in antioxidants, which help protect cells from oxidative stress and damage caused by free radicals. Antioxidants can be beneficial for overall health and play a role in reducing the signs of aging and maintaining skin health.

SKIN HEALTH

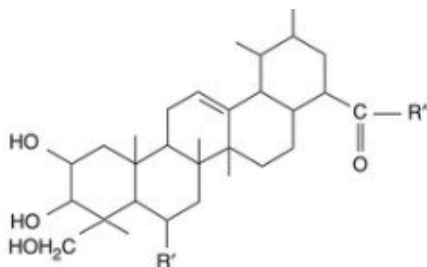

help improve skin texture, reduce inflammation, and promote a more youthful appearance.

ANTI-INFLAMMATORY

has anti-inflammatory properties that can be valuable for soothing skin irritations and addressing inflammatory skin conditions.

UV PROTECTION

may offer protection against UV radiation

REJUBEAU: REGENERATING

SODIUM DNA (PDRN)

SKIN REJUVENATION

support skin rejuvenation and improve skin elasticity.

WOUND HEALING

aid in the healing of wounds and reduce the formation of scar tissue.

ANTI-AGING

reduce the appearance of fine lines and wrinkles.

HYDRATION

help improve skin hydration and moisture retention.

STIMULATION OF COLLAGEN PRODUCTION

stimulate the production of collagen, which is essential for maintaining skin structure and firmness.

LEONTOPODIUM ALPINUM CALLUS CULTURE EXTRACT

ANTIOXIDANT PROPERTIES

is rich in these antioxidants, which can help protect the skin from oxidative stress and damage caused by free radicals.

ANTI-AGING BENEFITS

help reduce the appearance of wrinkles, fine lines, and other signs of aging.

SKIN SOOTHING

can be beneficial for soothing the skin, reducing redness, and addressing skin irritations.

SKIN BRIGHTENING

brighten the skin and even out skin tone

NIACINAMIDE & ADENOSINE

SKIN BARRIER FUNCTION

supports the skin's natural barrier function, helping to retain moisture and keep the skin hydrated.

SKIN BRIGHTENING

help reduce the appearance of dark spots, hyperpigmentation, and uneven skin tone.

ANTI-AGING

can be beneficial for soothing the skin, reducing redness, and addressing skin irritations.

MINIMIZES PORES

help reduce the appearance of enlarged pores, leading to smoother-looking skin.

LIPOLYSIS SOLUTION | Specially designed for reshaping face and Body

PREMIUM LIPOLYSIS & ANTI-CELLULITE & SLIMMING AESTHETIC SOLUTION

3 - STEP MECHANISM

STEP1.
LIPOLYTIC EFFECT

STEP2.
BLOOD CIRCULATION IMPROVEMENT

STEP3.
SKIN ELASTICITY IMPROVEMENT:

FUCUS VESICULOSUS EXTRACT and CYNARA SCOLYMUS LEAF EXTRACT stimulate the metabolism and the fatty acids elimination activating their combustion cycle. In natural way, via the bloodstream the fat transported into the liver and metabolized.

AESCULUS HIPPOCASTANUM (HORSE CHESTNUT EXTRACT) enables a visible tightened and smoothed change over the application area.

FUMARIA OFFICINALIS FLOWER/LEAF/STEM EXTRACT stimulates the production of collagen so that the dermis is strengthened and skin texture is improved.

INGREDIENT

AQUA, SODIUM CHLORIDE, ASCORBIC ACID, AESCULUS HIPPOCASTANUM (HORSE CHESTNUT) EXTRACT, HIERACIUM PILOSELLA EXTRACT, FUMARIA OFFICINALIS FLOWER/LEAF/STEM EXTRACT, THIAMINE HCl, RIBOFLAVIN, PYRIDOXINE, NIACINAMIDE, MAGNESIUM ASCORBYL PHOSPHATE, FUCUS VESICULOSUS EXTRACT, CYNARA SCOLYMUS LEAF EXTRACT, MAGNESIUM GLUCONATE, EQUISETUM ARVENSE

01 Jowl areas, double chin
deep marionette lines and jowl line.

02 Axillary(Armpit) Folds
Ugly folds in an axillary zone.

03 Arm
Sagging skin in the upper arms.

04 Abdomen
Fat rolls and flabby skin on the abdomen when you sit down.

05 Thigh
It helps to trim the bulkiness off, creating sculpted calves.

06 Calf
Big and heavy thighs

PROLO PRP KIT

AUTOLOGOUS PRP THERAPY SOLUTION | Advanced Platelet Rich Plasma Concentrator & Harvester

PROLO 20, 30, 50 PRP KIT ARE THE SAFE, SIMPLE, & EFFECTIVE AUTOLOGOUS THERAPEUTIC SOLUTION

As a concentrated source of blood plasma and autologous conditioned plasma, PRP contains several different growth factors and other cytokines that can stimulate healing of soft tissue and joints.

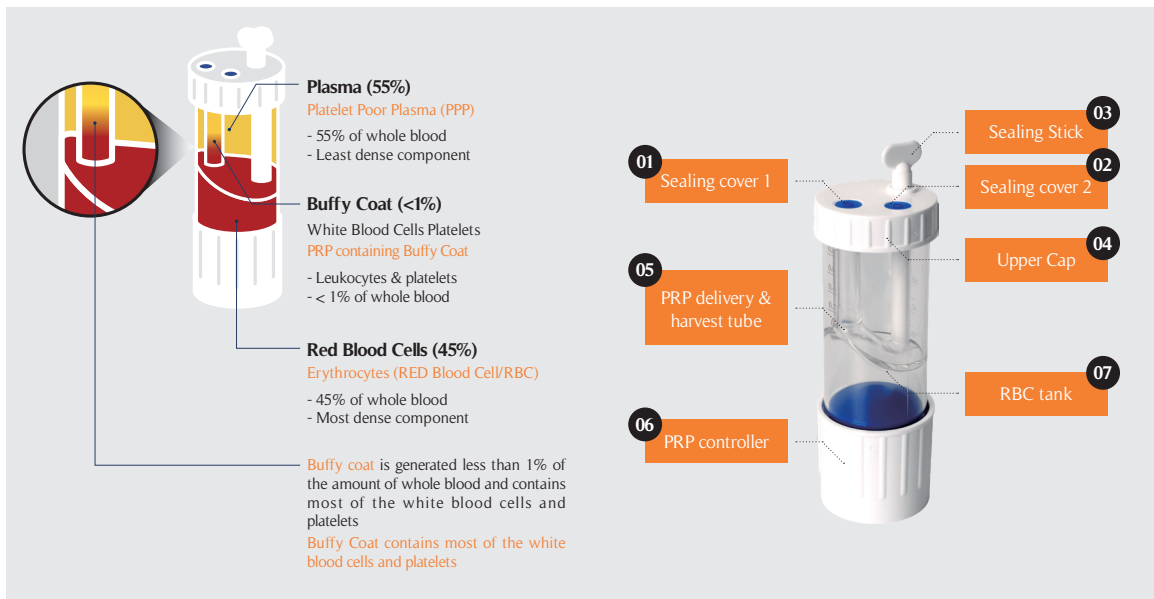

There are some indications for use in sports medicine and orthopedics (acute muscle strains, tendinopathy and muscle-fascial injuries and osteoarthritis), or dermatology (androgenic alopecia, wound healing, skin rejuvenation, and hair loss) or even in proctology.

PROLO is the best solution to harvest the highly concentrated PRP from patient's whole blood by simple, easy, and safe operation system. With Approx. 8 times of PRP concentration rate the highly concentrated and enriched PRP harvested from PROLO maximizes autologous therapeutic effect basically. So PRPLO gives high satisfaction to patient and clinician

MODEL NAME	WHOLE BLOOD	ANTICOAGULANT	CENTRIFUGATION	HARVESTED PRP	CONCENTRATION RATIO
PROLO 20	Max 18 cc	2 cc	3500 rpm for 4 min	About 2 cc with 0.2 cc of buffy coat	About 8 times
PROLO 30	Max 27 cc	3 cc	3500 rpm for 4 min	About 3 cc with 0.3 cc of buffy coat	About 8 times
PROLO 50	Max 45 cc	5 cc	3500 rpm for 4 min	About 5 cc with 0.5 cc of buffy coat	About 8 times

BOTAONE

CLOSTRIDIUM BOTULINUM TOXIN TYPE A | High Potency, High Purity, High Stability, High Effectiveness

Botulinum toxin can only become a safe product once it has been precisely filled under stringent quality control standards during manufacturing.

BOTAONE botulinum toxin maintains a stabilized titer by applying stringent quality control standards.

Moreover, it is easy to predict the best results as it maintains a high potency and purity through the development of an optimal freeze-dried process.

BOTAONE is manufactured under the separation and purification based on the “protein extraction technology from milk” known as the highest-level technology in the field of protein separation and purification,

HIGH POTENCY	HIGH PURITY	HIGH STABILITY	HIGH EFFECTIVENESS
--------------	-------------	----------------	--------------------

MODEL NAME	PACKING UNIT	CLOSTRIDIUM BOTULINUM TOXIN A TYPE	OTHER INGREDIENT
BOTAONE Inj.	100 units x vial / 10 vials a box	100 units	Albumin, Sodium Chloride

Active Ingredient	Clostridium botulinum toxin type A	Unit	100 units
Indications	Glabellar lines	Contents	Albumin, Sodium Chloride
Description	A white injectable dry powder in a transparent glass vial which should become a colorless, transparent liquid when reconstituted with a solvent (normal saline solution)		
Complex size	Compounds of molecular weight of 900kDa		
Mechanism	By decreasing the release of acetylcholine which caused muscle contraction, causing relaxation of muscles. Only muscles in the injected area are locally paralyzed, diluting these toxins used for treatment such as neurological or muscle diseases to a safe concentration and injecting them into the muscles to reduce facial wrinkles. Thick wrinkles on the face are caused by the contraction of the facial expression muscle, so botulinum toxin can be injected into this muscle to suppress the action of nerves that cause muscle contraction, thereby moderating wrinkles.
